Features and Implementation

MyYanga v4 - technical feature matrix & AWS engineer checklist ZonicMe Limited - Pre-production - July 2026

Companion docs: MYYANGA_V4_CAPABILITIES.md- AWS_SECRETS_RUNBOOK.md - PRODUCTION_BUILD.md

1. Features available to Brands

Feature	What it does	Implementation notes
Discover promotion	Appear in promoted brand pool when is_promoted	Monetization gate creator_promotion; Admin Monetization / e-vet approve
Virtual Wear pool seat	Outfits rotate into member VW by gender + event + style	vwPool.js paidVwBrandIds + no-repeat until pool cycles
Equal patronage CTAs	WhatsApp, Instagram, VW, Shop on Discover cards	Discover + creator rows
E-vetting / CAC dossier	Legal name, RC, directors, ID, scandals cleared	Admin privilege brand_e_vetting; eVetStore.js snap + approve
Cart unlock	Members can Add to Bag only when e-vetted	commerce.js isBrandShopReady
Gateway settlement	Funds to brand subaccount; MyYanga commission at gateway	Edge payments retail_init + Flutterwave flat_subaccount
Brand Insights	Aggregated fashion analytics pack	analytics.js buildBrandInsightPack; Insights Studio
Editorial Focus	Designer / fabric / makeup / photograph in Focus	Admin Editorial -> editorial_daily
Reel ad slots	Brand panes inserted into member reels	Admin Reel Config max_brand_slots_per_reel
Look share destination	Shared looks can deep-link patronage	/look/:code + LookSharePage

2. Features available to Users (members)

Feature	What it does	Implementation notes
Home / Explore / Shop	Editorial + theme browse + shoppable grid	myyanga-app.jsx views; mock or Supabase via dataBridge
Smart Search	His/Hers + multi-tick filters + look decks	SmartSearchPage + smartSearch.js / edge
Virtual Wear	Photo -> theme/outfit -> paid-pool look	VirtualWearPage + virtualWear.js (Gemini -> canvas)
Reels inbox	Curated image reels; channel toggles	ReelsPage + reelEngine.js / reelStore.js
Settings	Profile + reel schedule (days, TZ, quiet hours)	SettingsPage + memberSettings.js
Blog	Fashion / creative-economy stories, share, comments	BlogPage + migration 011
Events	Fashion events; optional pay gate	EventsPage
Post Your Look	Competition entry + votes	PYLPage + vote_pyl
Look share	Public look URLs + guest comments	LookShare + RLS
Bag / PDP	Size/colour matrix; designer split preview	ProductPage, BagPage, cartStore
Premium	Membership surface	Premium view + gate premium
Auth	Google default; WhatsApp OTP; email	hooks.js + auth-whatsapp
Legal pages	About, Privacy, Terms, Contact, Grooming	LegalPage.jsx - no 404 footer stubs
Analytics (passive)	Anonymized autocapture	SiteAnalytics + migration 008

3. Features available to Admin

Feature	What it does	Implementation notes
Admin Studio shell	Tabbed operator console	Visible when isAdmin (owner/admin/co-owner)
Content Studio	Page copy/media; Testing garment uploads	ContentStudio.jsx
Access Control	Directory, privileges, co-owners, transfer	AccessControlStudio + RPCs migration 007
Monetization Studio	Free/paid gates + provider order	MonetizationStudio
Editorial	Carousel programming	Admin Editorial
Analytics / Insights	KPIs + fashion rollups + AI assistant	InsightsStudio + edge ai-chat
Catalog tables	Products, discovers, premium, deletes	Role-gated delete selected / delete all
E-vetting / CAC	Snap CAC listing, approve, unlock cart	EVettingStudio
Reel Config	Images per reel, brand slots, delivery mode	Override local + live config
Mode toggle	Testing <-> Production	Bottom-left; Production needs Supabase env
Testing auto-admin	Sign-ups get full studio privileges	TESTING_PHASE_PRIVILEGES - revoked in Production
Founding claim	oadeagbo@gmail.com -> super admin	FOUNDING_OWNER_EMAIL + claim_founding_owner

4. Outstanding dependencies for AWS / platform engineers

Actionable checklist - complete before public Production traffic.

4.1 Auth & identity

- [ ] Create/link Supabase project; set VITE_SUPABASE_URL + VITE_SUPABASE_ANON_KEY at build time
- [ ] Enable **Google** provider (Client ID/Secret); add SPA redirect URLs
- [ ] Confirm founding email oadeagbo@gmail.com claims via claim_founding_owner after first Google login
- [ ] Deploy auth-whatsapp; set WHATSAPP_CLOUD_TOKEN + WHATSAPP_PHONE_NUMBER_ID (**Meta Cloud API - no BSP**)
- [ ] Document dedicated SIM is for Meta business registration only, not unofficial automation

4.2 AI & Virtual Wear

- [ ] supabase secrets set GOOGLE_API_KEY= (Gemini)
- [ ] Deploy virtual-tryon; verify 501 -> client canvas when key absent (fail-soft)
- [ ] Optional: ANTHROPIC_API_KEY for smart-search / ai-chat summaries

4.3 Reel delivery

- [ ] In-app inbox works without secrets - verify in Staging
- [ ] RESEND_API_KEY (+ REEL_EMAIL_FROM) for email channel
- [ ] Wire VAPID + Deno web-push for production fan-out (VAPID_*)
- [ ] WhatsApp Cloud optional; else rely on client wa.me queue

4.4 Payments & commerce

- [ ] Set FLUTTERWAVE_SECRET_KEY,PAYSTACK_SECRET_KEY,STRIPE_SECRET_KEY
- [ ] Configure Flutterwave **subaccounts** per e-vetted brand
- [ ] Set PUBLIC_APP_URL for payment return URLs

- [ ] Deploy payments; test retail split + feature-gate verify
- [ ] Deepen webhook signature verification before high volume

4.5 Database & hosting

- [ ] Apply migrations **001-011** in order (npm run sb:migrate or SQL Editor)
- [ ] Create storage buckets (product-images, brand-assets, editorial, user-uploads)
- [ ] npm run build -> deploy dist/ to S3+CloudFront / Amplify / Netlify / Vercel
- [ ] SPA fallback for /look/* and query-string deep links
- [ ] Set SUPABASE_SERVICE_ROLE_KEY on edge only (never in client)

4.6 CAC / e-vetting ops

- [ ] Operators with brand_e_vetting privilege trained on CAC portal snap workflow
- [ ] Manual snap of CAC listing into form (no automated CAC scrape assumed)
- [ ] Approve only when minimums met + scandals cleared + subaccount ready

4.7 Secrets inventory

See docs/AWS_SECRETS_RUNBOOK.md and root .env.example.

5. Key source map

Area	Path
App shell / CSS / routing	src/myyanga-app.jsx
Auth	src/hooks.js, src/lib/testStore.js, src/lib/accessControl.js
VW	src/pages/VirtualWearPage.jsx, src/lib/virtualWear.js, src/lib/vwPool.js
Reels	src/lib/reelEngine.js, src/pages/ReelsPage.jsx
Commerce	src/lib/commerce.js, src/lib/retailCheckout.js, src/pages/ProductPage.jsx
Legal stubs	src/pages/LegalPage.jsx
Edge	supabase/functions/*
Migrations	supabase/migrations/001-011

6. Quality gates

```
npm run verify:production
npm run audit:aggressive   # target SHIP 100/100
npm run build
npm run docs:pdf
npm run package:staging
```

Screenshot refresh: npm run build && node scripts/capture-architecture-shots.mjs && node scripts/build-architecture-html.mjs
